Every race, step by step

- 1 Open the app** — get your code from the **results tent**, or scan the QR. Enter your name once at the start of the day.
- 2 Pick the race** — tap the suggested race, or choose year group > event > A/B/C.
- 3 Tap the finishing order** — winner first, then 2nd, 3rd... Wrong tap? Undo ↶ or the X.
- 4 Check & Submit** — tap any forms that **didn't run**, add winning time if handy (optional), then **Submit result**.
- 5 Wait for the green "Saved!"** — that's your proof it went in. Then "Enter another result".

★ Golden rules

- No signal? Fine.** It saves on your phone and sends itself later. Don't refresh or delete.
- Always reach "Saved!"** No green screen = it didn't send.
- One race at a time.**
- You can't break it.** The tent checks every result.
- Mistake?** "Submit a correction" — newest wins.
- Yellow card** = the tent has a question. Tap, check, resend.

App won't work? (Dead phone, no data, won't load.) Don't lose the result — write it on the **paper sheet** and bring it to the **results tent**. Patchy signal on its own is fine (it saves & sends later).
